SUMMARY

Computer Science and Engineering student (B.Tech, 3rd year) with hands-on experience in Machine Learning, Deep Learning, Computer Vision, Generative AI, and full-stack web development. Proficient in Python, C++, JavaScript, and SQL, with 150+ Data Structures and Algorithms problems solved on LeetCode and a strong foundation in probability and statistics. Built AI-driven applications using PyTorch, TensorFlow, OpenCV, LangChain, and Retrieval-Augmented Generation (RAG), and scalable full-stack applications using React, Node.js, MongoDB, and MySQL. Seeking a Software Engineer, AI/ML Engineer, or Full-Stack Developer internship.

WORK EXPERIENCE

Participant 2026
Smart India Hackathon Kolkata, India

- Developed the backend of a multilingual AI health chatbot, integrating Machine Learning logic for intelligent responses
- Implemented monitoring dashboards using Prometheus and Grafana to track system performance

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering 2024 – 2028
Netaji Subhash Engineering College Kolkata,India

Higher Secondary (Class 12) 2021 – 2023
Little Flower House School Varanasi, India

Secondary (Class 10) 2019 – 2021
Sant Atulanand Residential Academy Varanasi, India

SKILLS

Programming Languages
Python, C++, JavaScript, SQL

AI Libraries and Frameworks
PyTorch, TensorFlow, Keras, OpenCV, scikit-learn, NumPy, Pandas, LangChain, Hugging Face

Databases
MySQL, MongoDB, FAISS

Core Computer Science
Data Structures and Algorithms, Probability and Statistics, Database Management Systems (DBMS)

Machine Learning and AI
Machine Learning, Deep Learning, Computer Vision, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Convolutional Neural Networks (CNN), Transfer Learning, Model Evaluation

Web Development
HTML, CSS, React, Node.js, REST APIs

Tools and DevOps
Git, GitHub, Prometheus, Grafana, DevOps Basics

CERTIFICATIONS AND TRAINING

Web Development + DevOps Cohort 12/2025
100xDevs Cohort 3; Harkirat Singh

Programming for Everybody (Getting Started with Python) 05/2025
University of Michigan, Coursera

PROJECT EXPERIENCE

Employee Attendance and Payroll Management System 05/2026 – 05/2026
SQL
Designed a normalized (3NF) MySQL database with 8+ interlinked tables for employees, attendance, and payroll. Wrote complex SQL queries using joins, subqueries, and window functions, and implemented stored procedures and triggers for salary calculation and data integrity. Exposed reports through REST API endpoints built with FastAPI.

Course Selling App 08/2026 – 08/2026
Full-Stack
Built a full-stack platform where instructors publish courses and learners browse, buy and access content, secured with JWT authentication and role-based access control

RAG-Based Generative AI Study Assistant 08/2026 – 09/2026

- Built a document Q&A assistant that answers from a student's uploaded study material, using embeddings, FAISS vector search and RAG, served through a FastApi backend.
- Wrote the prompt templates that keep answers grounded in the uploaded context;
